

SARTHAK ARYA

Full Stack Developer & Mobile App Developer

sarthakarya1068a@gmail.com | 8800299431 | [linkedin.com/in/sarthak-arya070104](https://www.linkedin.com/in/sarthak-arya070104) | github.com/arya070104

PROFESSIONAL SUMMARY

Full Stack Developer and Mobile App Developer skilled in Flutter, Firebase, Java, Spring Boot, Python, React, and MongoDB. Built scalable web and mobile applications, backend systems, and AI-powered solutions through internships at Honda Motorcycle & Scooter India (HMSI) and Innovians Technology, and through independent projects. Delivered real-time applications, inventory systems, attendance management platforms, and NLP-based machine learning projects. Strong command of software engineering principles, database management, REST APIs, and cloud-integrated applications.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, Dart, C

Frontend Development: React.js, HTML5, CSS3, JavaScript

Mobile Development: Flutter, Firebase

Backend Development: Spring Boot, Spring Framework, Java Web Applications, JDBC, REST APIs

Databases: MySQL, MongoDB, Firebase Firestore

Tools & Technologies: Git, GitHub, Linux, Maven, Streamlit

Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Microservices, Software Engineering, Middleware Frameworks

INTERNSHIP EXPERIENCE

Honda Motorcycle & Scooter India (HMSI) — Backend Development Intern Jun 2025 – Jul 2025

- Worked on the Digitalized Checklist System, contributing backend functionality enhancements that improved workflow efficiency and process automation.
- Developed an Inventory Management System using Python and Streamlit, implementing database operations, inventory tracking, and reporting functionalities.

Technologies: Python, Streamlit, MySQL, Database Management

Innovians Technology — AI & Machine Learning Intern Jun 2024 – Jul 2024

- Learned Generative AI concepts, Prompt Engineering, and worked hands-on with Large Language Models.
- Developed a Text Summarization System using BERT, processing large textual datasets and gaining practical experience in NLP and Deep Learning.

Technologies: Python, NLP, BERT, Transformers, Machine Learning

PROJECTS

Civic Connect — Full Stack Mobile Application Nov 2025 – May 2026

A civic issue reporting platform that allows citizens to report public issues and track their resolution status.

- Developed and shipped a full-stack civic issue reporting application using Flutter and Firebase.
- Implemented real-time updates, user authentication, and post creation features.
- Designed scalable backend architecture for managing user-generated content.
- Built an intuitive mobile UI for issue reporting and tracking.

Technologies: Flutter, Dart, Firebase Authentication, Cloud Firestore, Gemini AI, Cloudinary, OpenStreetMap, Provider, REST APIs, Geolocator

AttendEase — QR-Based Attendance Management System Jan 2025 – Apr 2025

A mobile application for attendance management using QR code technology.

- Developed a QR-based attendance management solution with student login and faculty dashboard.
- Integrated Firebase for secure authentication and real-time data storage.

- Improved attendance tracking efficiency through real-time database updates.
- Designed user-friendly interfaces for students and faculty.

Technologies: Flutter, Firebase Authentication, Firebase Firestore

Inventory Management System — Enterprise Web Application

Jun 2025 – Jul 2025

A web application to manage inventory records and automate stock operations.

- Built an inventory management solution with automated workflows and a reporting dashboard.
- Implemented complete CRUD functionality and product management features.
- Integrated database systems for real-time inventory tracking.
- Improved operational efficiency through process automation.

Technologies: Python, Streamlit, MySQL

Text Summarization System — Machine Learning & NLP

Jun 2024 – Jul 2024

An NLP-based text summarization application using BERT transformer architecture.

- Built an NLP-driven text summarization system using BERT and Transformer architecture.
- Processed large textual datasets efficiently through a custom NLP pipeline.
- Applied transformer-based deep learning techniques to generate concise summaries.

Technologies: Python, BERT, Transformers, NLP

LinkedIn Clone — Frontend Development

Dec 2024 – Feb 2025

A LinkedIn-inspired responsive web application.

- Developed a responsive LinkedIn-style web application with reusable UI components.
- Implemented a dynamic frontend replicating core professional networking layout features.

Technologies: HTML, CSS, JavaScript

EDUCATION

The NorthCap University, Gurugram — B.Tech, CSE (Full Stack Development)

2022 – 2026

CGPA: 7.88

Academic Subjects: Data Structures, DBMS, Operating Systems, Computer Networks, Mobile Applications, Microservices, Middleware Frameworks, Enterprise Web Applications, Software Engineering, Project Management

Narayana E-Techno School — Class XII (CBSE)

2022

Score: 70%

Narayana E-Techno School — Class X (CBSE)

2020

Score: 79.6%

ACHIEVEMENTS & COMPETITIONS

Smart India Hackathon (SIH) 2025

Nov 2025

- Participated in a national-level team-based innovation competition.
- Designed technology-driven solutions under strict deadlines, gaining experience in problem-solving, teamwork, and ideation.

EXTRACURRICULAR ACTIVITIES

- Participated in Google x NCU Club events.
- Volunteered in academic group activities and assisted peers in collaborative learning initiatives.

LANGUAGES

English, Hindi, Mandarin (Traditional Chinese)
